STARDUST

A software platform for games in the metaverse

Blockchain is...

- **Expensive** - Engineers cost $1m+ a year, not including devops and infrastructure

- **Time Consuming** - 12+ months to build a scalable, robust, and secure solution

- **Poor User Experience** - 98% drop off rate when asking for a blockchain wallet

- **Privacy and Security Concerns -** Private keys and user data exposed client side
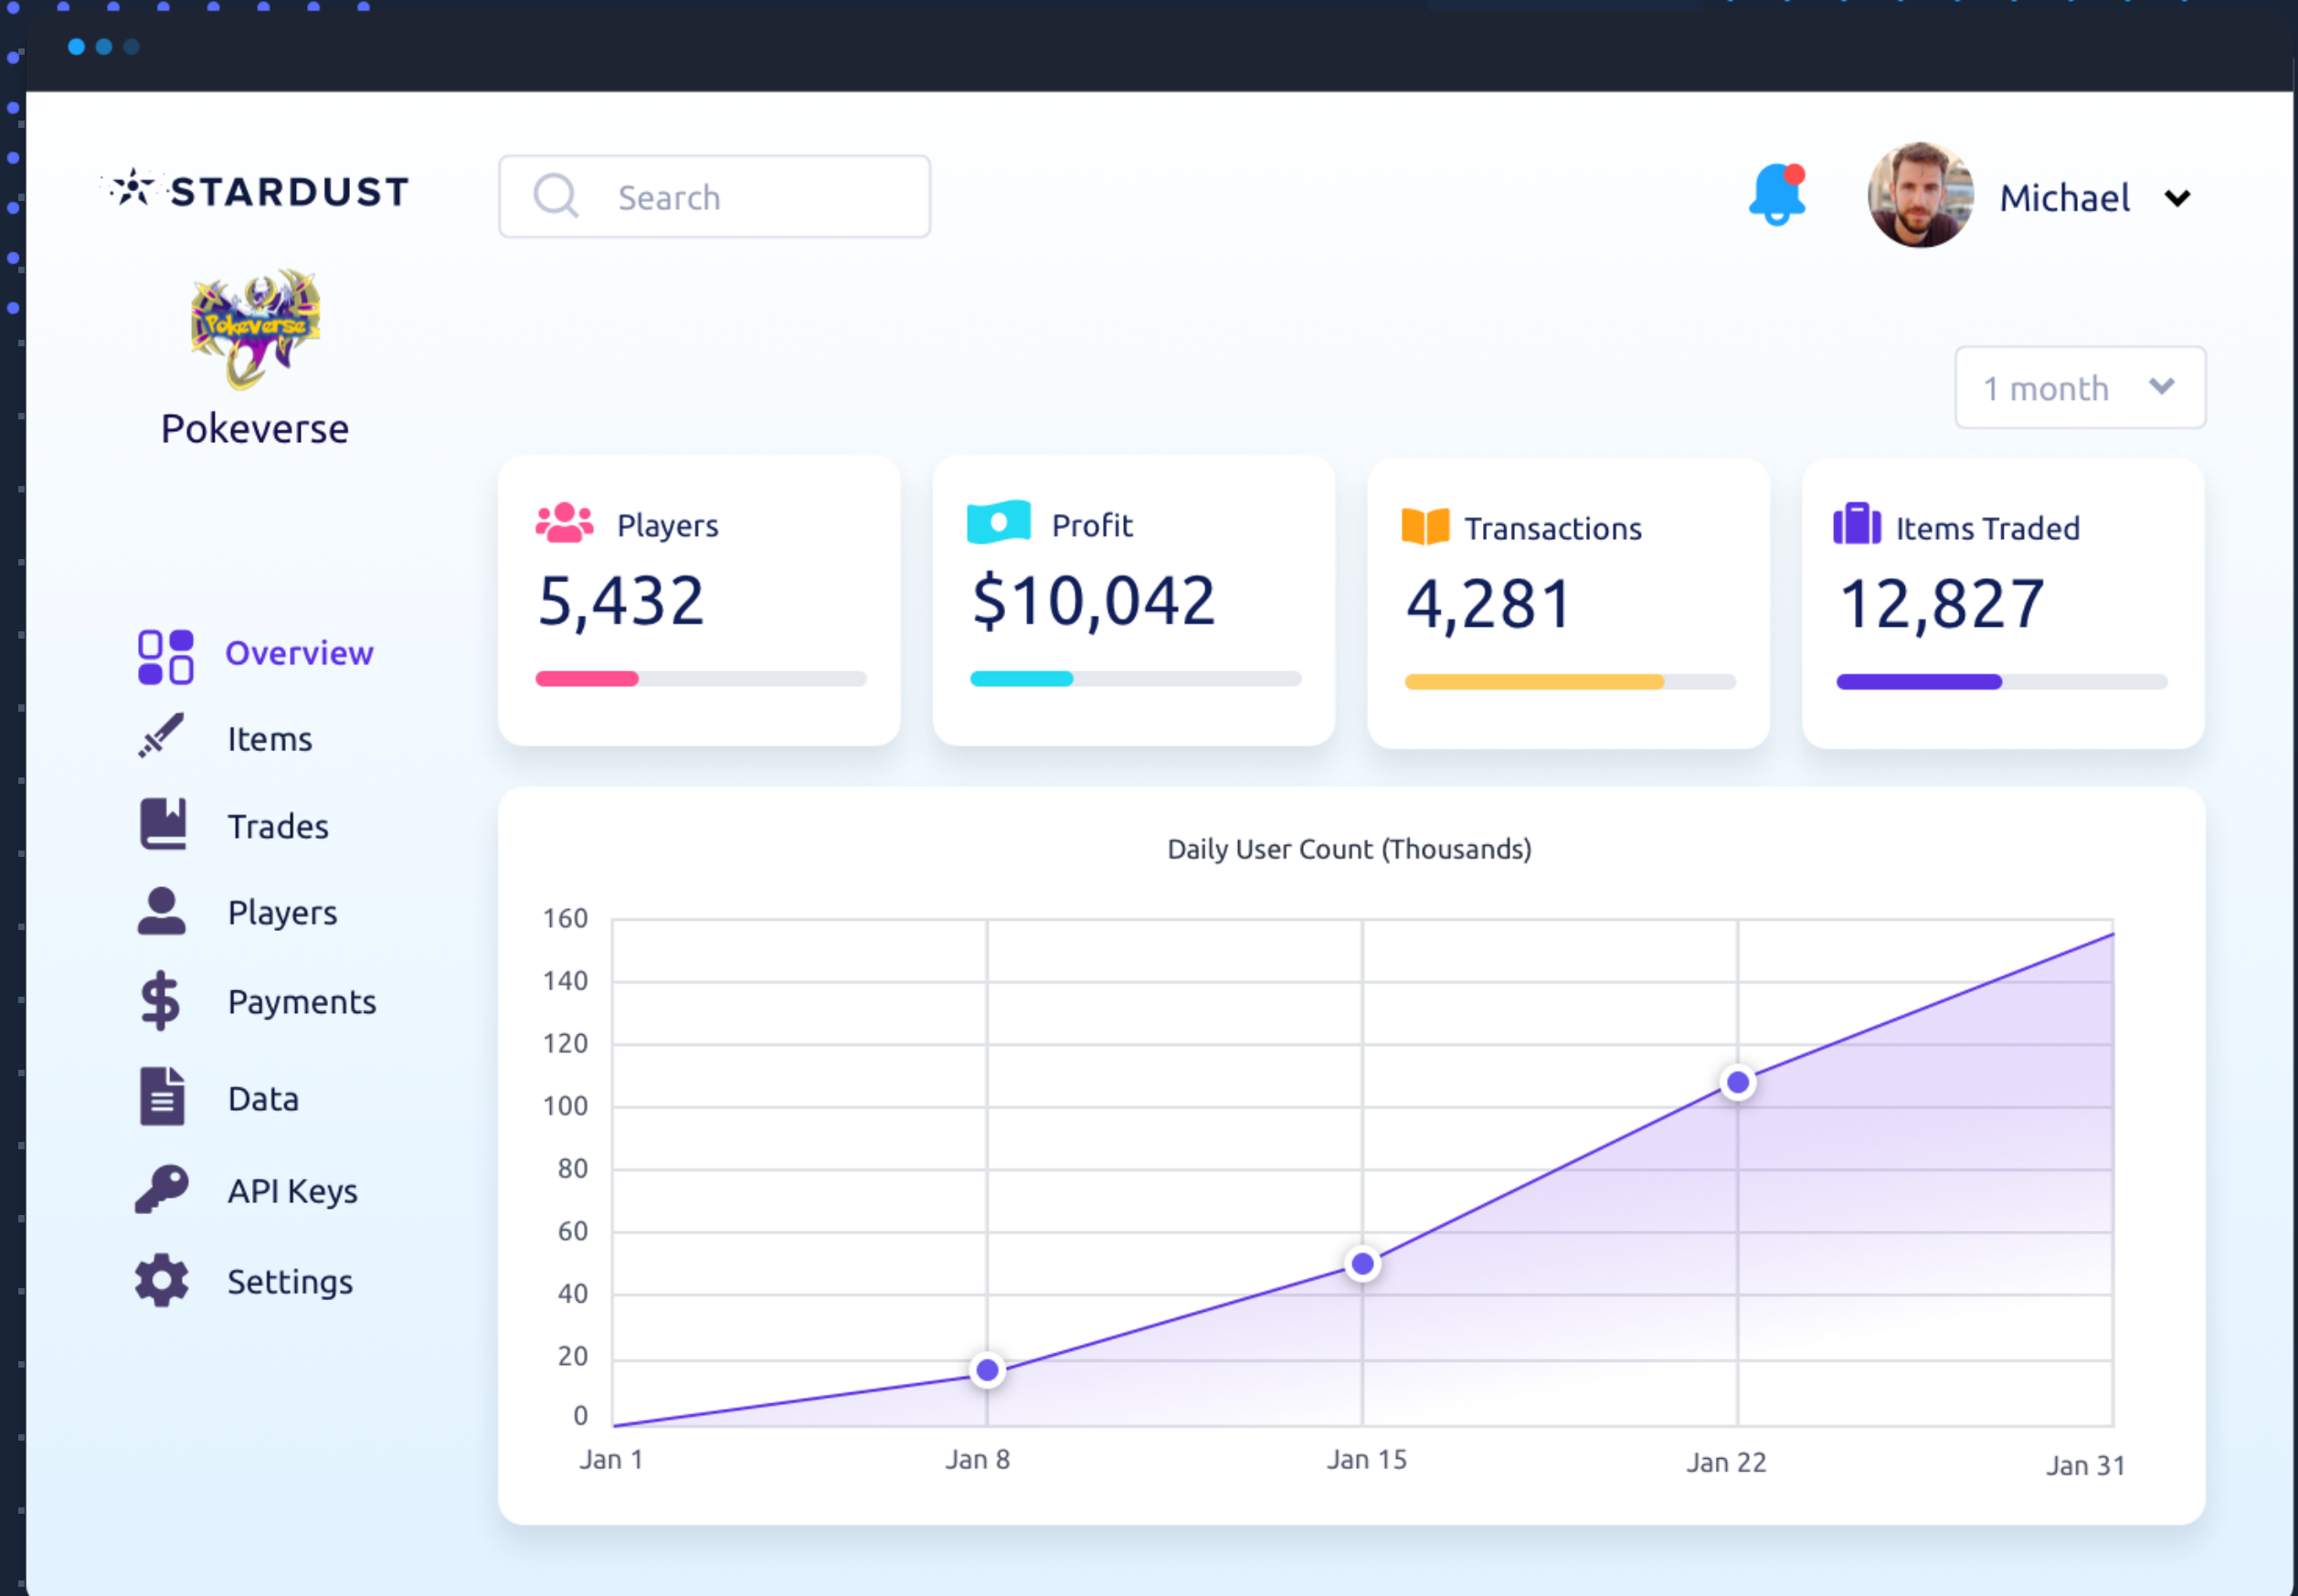

Stardust is...

● **Low Overheard** - Use existing engineering resources, no additional engineering talent needed

● **Easy to Integrate** - 10 minutes to put NFTs in your game

● **Consumer Friendly** - No blockchain exposed to players

● **Secure -** Managed wallet infrastructure through fireblocks

Stardust Core Features

**All of the benefits of blockchain.
None of the costs.**

- Graphical Game Creation

- Easy gas-free API

- Hosted wallets ▲ **Fireblocks**

Stardust Monetization

- Fiat + Crypto payment widget   CIRCLE

- Marketplace

- DeFi Integrations

Total: $15.00
